The class builds upon a required class in calculus (or business calculus) and offers the economics department an opportunity for remediation (if necessary) and the introduction of more advanced skills before students take upper-division economics classes, in particular ECON 300. Problem-solving skills relevant to this objective require algebra, basic graphing, and calculus. These skills will be emphasized in ECON 210.</li> <li>- We have also added 300-level classes as prerequisites to several upper division electives in the Q2S redesign. Upper division classes with a 300-level pre-requisite will have a 400-level prefix. This will allow faculty to teach more advanced problem-solving skills.</li> </ul>
